

## Product Highlights

### Benefits

- Configurable according to user's needs
- Automatically and accurately authorizes team members & security personnel
- Saves time by being able to complete bulk operations on Item structures

### Prerequisites for GoSaaS Power Tools

- GoSaaS Power Tools, Workflow Manager, Security Manager & BOM Manager work with Oracle Product Development Cloud

**GoSaaS Power Tools** are a set of functionalities created especially for Oracle Product Lifecycle Management Cloud to fasten and optimize workflow. There are 3 versions of this functionality.

### Workflow Manager

Automated assignment of users/roles on a Change for Approval, on the basis of the Change itself and its Affected Items.

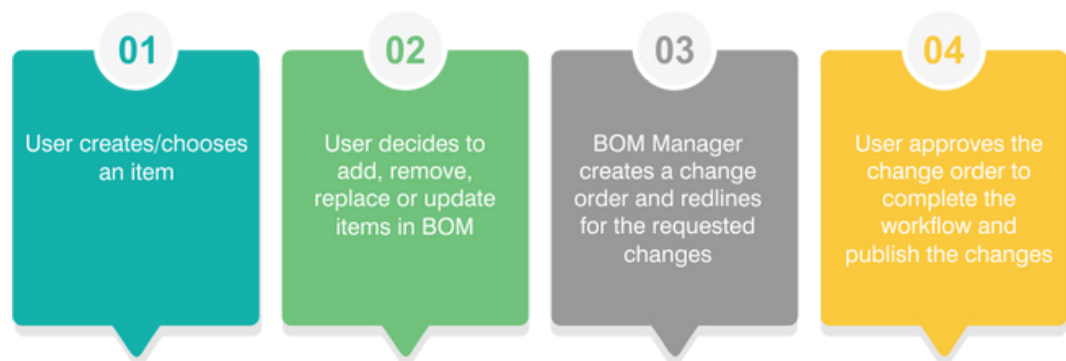

### Security Manager

Automated assignment of users/roles and their Actions (allowed privileges) to manage access on Items, Trading Partner Items and Changes.

### BOM Manager

Change controlled component addition, removal and replacement to facilitate structural updates.
